EDUCATION

University of California, Davis (UC Davis)

Davis, CA

Bachelor of Science in Computer Science

Sept. 2024-Jun. 2028

- GPA: 3.637/4.0
- Technical Skills: Python, C++, HTML, CSS, PyTorch, Git, Docker, Agent Development, Cursor, Claude Code, Stitch, Agentic RAG, API Integration, Data Normalization, Linux, Windows, MacOS

SELECTED PROJECTS

UC Davis AI Academic Advisor (Agentic RAG System) | pathfinder.demo.richis.top

Sept. 2024-Present

- Developed an autonomous AI-powered course planning & advising system using Agentic RAG and function calling
- Constructed a structured knowledge base by scraping and normalized 9000+ course records, degree prerequisites, and 10,000+ student reviews
- Designed a context summarization module to compress conversation history, significantly reducing token cost while maintaining multi-turn-dialogue coherence
- Built a schedule builder-driven advising system to support personalized course planning, enabling export and synchronization functionality for nearly 1000 students

Multi-Modal Route Planning System

Jan. 2026-Mar 2026

- Engineered a route planning system in C++, processing real-world OpenStreetMap data and transit networks via the Expat XML parser
- Implemented Dijkstra's algorithm to compute shortest and fastest routes on large-scale graphs, incorporating multiple methods of transportation (biking, walking and bus), one-way constraints, and speed limits
- Applied the PImpl idiom to reduce coupling and improve compilation efficiency, achieving the optimization of graph storage and lookup performance
- Developed a navigation instruction generation module, transforming raw path outputs into human-readable directions
- Built a robust build and testing pipeline with Makefiles, GoogleTest and Google Mock, ensuring accuracy and stability of large-scale graph data

INTERNSHIPS

Department of Plant Science, UC Davis

Davis, CA

PLS 021 Tutor and Intern

Sept. 2025-Mar. 2026

- Supported instruction in software platforms including Gmail, Google Drive, Google Sites, Microsoft Word, Excel, R Studio and database tools for students
- Graded assignments, quizzes, and exams, ensuring accurate and timely feedback
- Assisted students in debugging and assignment clarification during lab sessions and office hours
- Contributed to course development by drafting lesson outlines and suggesting improvements for future instruction

Qi An Xin Technology Group Inc.

Wuhan, China

Software Engineering Intern

Jul. 2025-Sept. 2025

- Developed and tested features for file sandbox and network traffic detection systems using Python and Linux
- Assisted in OTA update operation and gained hands-on experience with system architecture and O&M workflows
- Customized export report formats based on client requirements
- Built Docker/CentOS environment and debugged cross-environment deployment issues
- Collaborated with a team of 20+ engineers, contributing to streamlined documentation process

LEADERSHIP

Photograph Team Leader, Chinese Union of UC Davis

Sept. 2024-Present

- Led a team of 10+ photographers to cover large-scale events including Orientation, Halloween Festival and Lunar New Year Celebration, producing and delivering high-quality visual content for social media and event documentation
- Provided portrait and instant photography services for team-building activities, strengthening member engagement and community cohesion
